## PROJECTS

### Videogames - App - Full Stack Developer

- Design and develop a video game App that includes: searches, filtering, ordering and creation.
- Develop the app using React, Redux, pure CSS (front-end) and Node.js with Express (back-end). Database in PostgreSQL and Sequelize.

<<https://github.com/TomasTag/PI-Videogames>>

### UnderEventApp - Frontend developer

- We developed this project by forming a team of 6 programmers. We use the scrum method to get a better organization and optimization of times and tasks. Weekly we presented sprints in front of a Product Owner (PO).
- Develop the app using React, Redux, CSS, bootstrap (front-end) and Node.js with Express (back-end). Database in PostgreSQL and Sequelize, among other frameworks that led us to make this application

## ABOUT ME

Full stack developer with training as a Web Designer. Experience working on projects with NodeJS, React, Redux, SQL, among other technologies in the sector. I was part of a team of programmers with whom we developed a project where I deployed more in the Front-end, but I feel comfortable working on the Back-end too. I have good skill and poise to work in a team, communicate, acquire new knowledge and judge me in a constructive way to work on my errors and faults.

## TECHNOLOGIES

HTML, CSS, Javascript, React, Redux, Node.js, Express, Postgres, Sequelize, Bootstrap, Scrum.

## SOFT-SKILLS

- Adaptability
- Customer Support
- Self-motivation
- Collaborativity
- Curiosity
- Listener
- Leadership
- Energetic
